

Love your ankles again.

Is ankle pain limiting your life? Now, you have options. Arthritis, reduced range of motion, and decreased quality of life are a variety of problems associated with ankle pain. New technologies, such as Wright's INBONE® implant, are available to help restore your normal lifestyle by providing stability, improved mobility, and reduced stress to the joint. Ask your doctor if INBONE® could be right for you and get back to loving life again, pain free.

INBONE®. Kick Pain to the Curb.

- Improve Mobility
- Experience Stability
- Reduce Pain

The INBONE® Total Ankle is intended to give patients limited mobility by reducing pain and restoring movement in the ankle. There are certain risks with ankle replacement surgery, which you should discuss with your surgeon. These may include pain and bruising, damage to blood vessels or nerves, infection, or blood clots that can travel to the heart and lungs. As with any joint replacement, the prosthesis cannot be expected to be as strong, reliable, or durable as a natural healthy human joint. Please visit [inbone.com](http://inbone.com) for more information. Additional product labeling can be obtained by calling 800.238.7117.
